

NATURAL GAS TRANSMISSION PIPELINE

Cold Lake Transmission Pipeline

Cold Lake

The Cold Lake transmission pipeline system is in east central Alberta, approximately 250 km east of Edmonton. The pipeline interconnects with TransCanada's NGTL and TransGas's systems. It services heavy oil projects, utilities and industrial customers with a reliable source of natural gas.

THE STATS

- Expansions completed in 2012, 2013, 2014 and 2018
- 250 km pipeline system
- 100 MMcf/d design capacity

➤ **Cold Lake provides reliable cost-effective gas transmission services to customers in the region.**
